

READING RESULTS: *Level 3*

ASSESSMENT SCORE: LEVEL 3

At Level 3, your child is scoring between the 5th and 10th percentiles. This means out of 100 students, your child is reading below at least 90 children their age.

LEVEL ANALYSIS

The score from this screener analyzes the likelihood your child is experiencing dyslexia-related challenges. The lower their score on the assessments, the lower their percentile level is, which equates to a higher risk of dyslexia or dyslexia-related challenges.

WHAT DOES THIS MEAN?

Children who score in the Level 3 percentile range are LIKELY to:

- Experience dyslexia-related challenges with reading accuracy, speed, endurance, comprehension, and spelling.
- Very likely to receive a diagnosis of dyslexia if they would undergo a comprehensive assessment in a clinic with a specialist.
- Without dyslexia treatment, they will likely need accommodations, assistive technology devices, support, and strategies for school and/or work.
